Siri is your do-it-all intelligent assistant that puts HomePod mini at the center of your family's activities
Siri can recognize the voices of up to six different family members
Easily communicate with your family members by voice using Intercom
A speaker that protects your right to privacy

Product Features

Nothing short of amazing

Jam-packed with innovation, HomePod mini delivers unexpectedly big sound for a speaker of its size. At just 3.3 inches tall, it takes up almost no space but fills the entire room with rich 360 degree audio that sounds amazing from every angle.

Boundary-pushing computational audio

Boundary-pushing computational audio creates the full, detailed tones of a much larger speaker - and HomePod mini turns it up without missing your voice commands.

Designed to fit anywhere in the house

Its elegant shape is wrapped in a perfectly seamless mesh fabric that's virtually transparent to the sound passing through it. A backlit touch surface on the top provides quick control.

Create a stereo pair

Two HomePod mini speakers paired in the same room create left and right channels for an immersive soundstage.

HomePod mini works effortlessly with your Apple devices

Pick up an incoming call from your iPhone, listen to music on your Mac, or upgrade your TV experience by taking the sound from your Apple TV to the next level - they all connect to HomePod mini.

Siri is your do-it-all intelligent assistant that puts HomePod mini at the center of your family's activities

Whether you need a hand with a wide variety of everyday tasks, want easy control over your smart home accessories, or simply want to hear your favorite song - just ask Siri.

Siri can recognize the voices of up to six different family members

So the music dad hears when he asks for something he'd like is totally different from what the kids hear when they ask. And with personal requests, Siri can recognize a particular voice and relay that person's information from iPhone apps like messages, calendar, reminders, and contacts.

Easily communicate with your family members by voice using Intercom

Ask Siri to send your message to the whole house or to individual rooms - and everyone can easily respond.

A speaker that protects your right to privacy

Privacy is essential - especially in your own home. HomePod mini is designed to keep your personal information safe and be a trusted assistant in your family's everyday life.

Main Specifications

Product Description	Apple HomePod mini - smart speaker
Product Type	Smart speaker
Enclosure Design	Passive radiator
Speaker Type	Active
Interfaces	Wi-Fi, Bluetooth
Platform	Apple HomeKit
